

Converting Movie Files with Prism

Movies saved from your Flip Video Camera, Iphone, Macintosh computer and some other devices are **.mp4** files. This type of file *cannot* be inserted into a PowerPoint or edited in Windows Movie Maker. To convert your movie to a **.wmv** file to use in PowerPoint or Movie Maker:

1. In the Multimedia folder of your NAL desktop, click the Prism Video Converter icon.
2. The Prism program will open in the middle of your screen:

3. Click on the green plus symbol on the left end of the program tool bar.
4. Browse to **H:\My Videos\FliShare Data\Videos** to see your saved flip videos.
5. Select the video you wish to convert and click on **Open**. Your video will be added to the **List of Files to Convert**.
6. Notice that the program automatically sets the “Output Folder” to **H:\My Videos**. This is where your converted files are saved.
7. Click the **Convert** button and your video will be converted and saved as a **.wmv** file.
