

Set Slide Show Timings Manually

When using the *PowerPoint Building Fluency* activity you can set the slide show timer to manually move the students through the activity:

1. In normal or slide sorter view, select the slide or slides you want to set the timing for.
2. On the **Slide Show** menu, click **Slide Transition**.
3. Under **Advance**, click **Automatically after**, and then enter the number of seconds you want the slide to appear on the screen.
4. To apply the timing to the selected slides, click **Apply**. To apply the timing to all slides, click **Apply to All**.
5. Repeat the process for each slide you want to set the timing for. To view the timings, click Slide Show at the lower left of the *PowerPoint* window.

Tip:

If you want the next slide to appear either when you click the mouse or automatically after the number of seconds you enter — whichever comes first — select both the **On mouse click** and the **Automatically after** check boxes.
