

Connie Christal

This is my second year at Bethany, and I feel very blessed to be here. Bethany is a loving, nurturing community of students, parents, and staff, and a special place where love, encouragement, and learning flourish.

I am originally from Florida, but have lived most of my adult life in Texas. After receiving a bachelor's degree in French from the University of Texas at Arlington, I attended the University of North Texas to obtain my master's degree in elementary education. I married my college sweetheart, and enjoyed working with children professionally, as well as on a volunteer basis, while we raised our two beautiful daughters. Desiring to work with special needs children, I returned to school and received a master's degree in communication disorders from the University of Texas at Dallas. For the past ten years, I have enjoyed working as a speech language pathologist in Plano ISD. I enjoy traveling, cooking, spending time with family and friends, and Bible study.

One of my favorite quotes: "They may forget what you said, but they will never forget how you made them feel." - anonymous
